

# Status of October Exercise for Muon Alignment

Aysen Tatarinov

Vadim Khotilovich

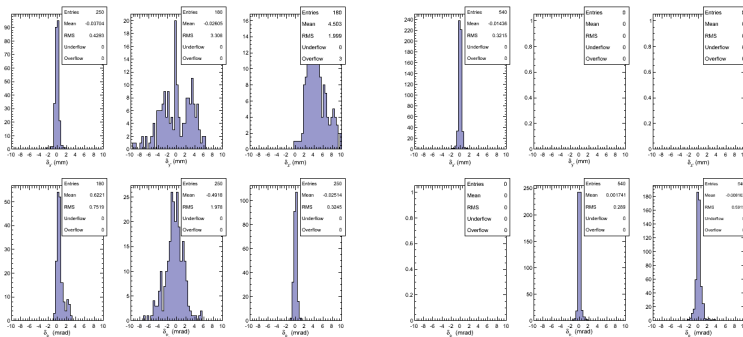

Jim Pivarski

*Texas A&M University*

27 October, 2009

- ▶ MC alignment with collisions and cosmunics: Aysen and Vadim
  - ▶ walked through whole procedure for aligning with collisions, from setting up jobs through 6-DOF position-error histograms
  - ▶ DT (left) some subtleties left (layer misalignment,  $\delta_z$  ambiguity)
  - ▶ CSC (right) good results

- ▶ Re-testing beam-halo procedures in MC: Jim
  - ▶ held up due to work on CRAFT-09 data alignment
  - ▶ aware that real beam-halo starts around Nov 8 or so...
